

GODSWILL NDUKACHUKWU DOUGLAS

Data Analyst | Power BI Specialist | Python & Machine Learning

Port Harcourt, Nigeria • +234 701 932 4243 • godswilldouglass117@gmail.com

[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

Microsoft Certified Power BI Data Analyst (PL-300) with a strong foundation in advanced data modeling, DAX, SQL, and Python-based predictive analytics. Experienced in delivering end-to-end analytics solutions — from raw data ingestion to executive dashboards — across energy, telecom, banking, hospitality, and HR domains. Proven track record of driving measurable business outcomes, including a 25% increase in operational efficiency and a 12% revenue growth opportunity through data-driven insights and interactive visual storytelling.

CORE COMPETENCIES

Analytics & BI	Power BI (DAX, Star Schema, Custom Calendars), Tableau, Advanced Excel, Pivot Tables
Programming	Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn), SQL (Window Functions, Joins, CTEs), R
Machine Learning	Random Forest, Regression Modeling, Predictive Analytics, Feature Engineering, RUL Modeling
Data Skills	Data Cleaning, EDA, ETL Pipelines, Data Modeling, KPI Development, Statistical Analysis
Compliance	GDPR awareness, Data Privacy, Security-conscious data practices
Productivity	Microsoft PowerPoint, Automated Reporting, Stakeholder Communication, Cross-team Collaboration

WORK EXPERIENCE

Data Science Instructor & Analyst <i>Spella Hub, Abakaliki, Ebonyi State, Nigeria</i>	May 2026 – Present
- Deliver structured instruction in Data Science, Data Analysis, and Data Visualization across in-person and virtual learning environments, supporting a consistent weekly schedule of 5 teaching and development sessions - Design and develop custom datasets for training purposes and internal organizational use, ensuring data quality and relevance to real-world analytical scenarios - Conduct end-to-end data analysis for Spella Hub operations, translating raw operational data into actionable insights for management decision-making - Build interactive dashboards and data-driven tools using Power BI to support internal reporting and strategic planning - Lead project development sessions focused on applied data science, guiding students and internal teams through hands-on technical projects	
Freelance Data Analyst - Dashboard <i>Private Hospitality Client • Port Harcourt, Nigeria</i>	Aug 2024 – Apr 2026
- Designed and delivered Power BI dashboards tracking hotel KPIs — RevPAR, ADR, and occupancy rates — enabling data-driven pricing decisions for senior management. - Identified a 12% revenue growth opportunity through pricing optimization analysis, directly influencing management strategy and room rate structure. - Automated data cleaning and reporting workflows in Python, reducing manual reporting time by 40% and improving data accuracy and consistency. - Built end-to-end data pipelines integrating booking, revenue, and operational data sources into a unified analytics layer, improving data reliability across teams.	

- Defined and maintained KPI frameworks, ensuring consistent metric definitions across finance and operations reporting.

Data Analyst Intern

National Institute of Information Technology • Port Harcourt, Nigeria

Aug 2021 – Oct 2021

- Cleaned and validated large datasets using Excel, improving data accuracy by 90% and establishing reusable data quality protocols adopted by the team.
- Built dynamic dashboards using Pivot Tables and advanced Excel visualization features to support executive reporting and decision-making.
- Conducted exploratory data analysis (EDA) in R to uncover consumer behavior trends, delivering strategic recommendations to stakeholders.

KEY PROJECTS

Predictive Health Monitoring for Jet Engines (NASA C-MAPSS)

Apr 2026

Python | SQL | Power BI | Random Forest | DAX

- Processed 20,000+ rows of NASA telemetry using SQL Window Functions, engineering Remaining Useful Life (RUL) targets from 26 sensor variables for predictive signal modeling.
- Developed a Random Forest Regressor achieving $R^2 = 0.95$ and MAE of 11.88 cycles, delivering highly accurate non-linear engine degradation predictions.
- Built a Power BI Star Schema with custom DAX calendar logic, converting cycle predictions into actionable, date-driven maintenance schedules for a 5-engine fleet.
- Identified a critical failure signature (S4/S11 sensor convergence at Cycle 271), implementing a 20-cycle maintenance trigger that increased operational efficiency by 25%.

Banking Credit Risk Analytics Dashboard

Oct 2025

Python | Power BI | EDA | SQL

- Built an end-to-end data pipeline analyzing credit risk for 5,000+ customers, from raw data ingestion through EDA to an executive Power BI dashboard.
- Identified high-risk loan segments and key delinquency activity trends, enabling proactive risk management strategies for the lending portfolio.
- Designed drill-through KPIs and interactive filters, giving the credit risk team self-service access to portfolio insights.

HR Analytics & Workforce Attrition Dashboard

Mar 2026

Power BI | DAX | KPI Design

- Developed an interactive Power BI dashboard analyzing workforce data for 300+ employees, featuring drill-down KPIs and attrition trend analysis.
- Identified a 50% attrition rate and pinpointed key retention drivers, providing HR leadership with targeted, data-backed intervention insights.

Predictive Generator Optimization for Telecom Towers

Aug 2025

Python | Regression Modeling | Predictive Analytics

- Built a regression-based ML model predicting generator runtime and diesel consumption by integrating solar output, grid availability, and load demand variables.
- Achieved a projected diesel cost reduction of 15–20% per tower, delivering significant OPEX savings insight for telecom operators.

Sales Performance Analytics Dashboard

Mar 2025

Power BI | DAX | Business Intelligence

- Designed an interactive sales dashboard tracking revenue KPIs, product performance, and customer segment profitability across multiple dimensions.

- Identified pricing and product mix optimization opportunities, increasing target profit margin from 50% to 54.2% through data-driven recommendations.

EDUCATION

B.Eng. – Electrical and Electronics Engineering

Elizade University • Ilara-Mokin, Nigeria

2020 – 2025

- CGPA: 4.45 / 5.00 — Second Class Upper Division | Top 10% of graduating class
- Honors: Dean's List | 5.0 GPA in 5 consecutive semesters

CERTIFICATIONS

[Microsoft Certified: Power BI Data Analyst Associate \(PL-300\)](#) — 2026

PUBLICATIONS

- Douglas, G.N., et al. (2026). "An IoT-Based Non-Intrusive Temperature Monitoring System for Star-Delta Controlled Induction Motors." Engineering Headway Journal.
- Douglas, G.N., et al. (2025). "IoT-Based Thermal Limit Monitoring and Protection of Induction Motor." International Conference, Elizade University.

LEADERSHIP & VOLUNTEERING

- Student Tutor – Engineering Mathematics: Mentored 100+ undergraduate students, contributing to an 80% pass rate in a historically challenging course.
- Community Volunteer – RCCG: Coordinated environmental and outreach programs, developing project management and community engagement skills.
